

Entity Framework Core 8.0

Lab 4: Inserting Initial Data into the Database

Scenario:

The store manager wants to add initial product categories and products to the system.

Objective:

Use EF Core to insert records using AddAsync and SaveChangesAsync.

1. Insert Data in Program.cs:

```
Program.cs
1  using RetailInventory.Data;
2  using (local variable) Category? electronics
3  using 'electronics' is not null here.
4  var electronics = new Category
5  {
6      Name = "Electronics"
7  };
8
9
10 var groceries = new Category
11 {
12     Name = "Groceries"
13 };
14 await context.Categories.AddRangeAsync(electronics, groceries);
15 var product1 = new Product
16 {
17     Name = "Laptop",
18     Price = 75000,
19     Category = electronics
20 };
21 var product2 = new Product
22 {
23     Name = "Rice Bag",
24     Price = 1200,
25     Category = groceries
26 };
27 await context.Products.AddRangeAsync(product1, product2);
28 await context.SaveChangesAsync();
29 Console.WriteLine("Data inserted successfully!");
```

2. Run the App :

```

PS C:\Users\laksh\RetailInventory> dotnet run
C:\Users\laksh\RetailInventory\Models\Product.cs
constructor. Consider adding the 'required' modifier.
C:\Users\laksh\RetailInventory\Models\Product.cs
ting constructor. Consider adding the 'required'
C:\Users\laksh\RetailInventory\Models\Category.cs
constructor. Consider adding the 'required' modifier.
Data inserted successfully!

```

3. Verify in SQL Server:

Products:

The screenshot shows the SQL Server Enterprise Manager interface. The Object Explorer on the left displays the database structure for 'RetailInventoryDb'. The central pane shows a SQL query executed successfully, returning two rows of product data.

Id	Name	Price	CategoryId
1	Laptop	75000.00	1
2	Rice Bag	1200.00	2

Category:

The screenshot shows the SQL Server Enterprise Manager interface. The Object Explorer on the left displays the database structure for 'RetailInventoryDb'. The central pane shows a SQL query executed successfully, returning two rows of category data.

Id	Name
1	Electronics
2	Groceries
